

The SERRAT Biomass recovery mulcher consists in a pick-up rotor which lifts up the pruning of fruit trees, vineyard and branches in a second rotor to mulch it. It can be operated by tractors from 150 to 170 HP and 180 to 250 HP with power take off on the front lift.

In the case of a standard tractor with a front power takeoff, it's possible to hitch a trailer behind to store the mulched material.

Mulcher with double reversible hydraulic feeder (system BRALAKC). This mulcher is capable of mulching branches up to 10 - 12 cm of diameter. The size grading is adapted so that the material can be directly used in waste heat boiler of biomasse.
